Nucleus expands communications team

Nucleus, the IFA-owned and controlled wrap platform, has bolstered its communications team with the appointment of Terry Huddart and Jenna Bennie as technical communications manager and people & development manager respectively.

Reporting to communications director Rebecca Christensen, the pair join the team responsible for all internal and external communication at Nucleus.

Huddart joins Nucleus from Aegon UK where he worked as a senior proposition management consultant. As part of his new role, he will be responsible for the production of a range of material to support the sales team.

Bennie joins Nucleus from Scottish Water Solutions where she was regional HR manager. In recognition that its people are the DNA of the business, Bennie will be responsible for ensuring staff engagement at Nucleus remains high as the business continues to develop and grow.

Commenting Christensen said: “This is a very exciting time for Nucleus as we continue to build on the enormous success of the last four years with new, market-changing initiatives. Both Jenna and Terry bring a wealth of experience and knowledge and will be instrumental in ensuring we execute these initiatives across our ever-growing community of IFAs and their new colleagues at Nucleus.”

About Nucleus

Nucleus Financial Group is an online wrap based business platform.

Nucleus was founded in 2006 by a number of high quality IFAs who shared a commitment to create a market where advisors have the infrastructure and desire to place the client centre stage.

Since foundation Nucleus has established itself as a major force for change in the market. It is now a community of IFA businesses who through ownership and control of the business process seek to create a better customer experience.

The management team is led by David Ferguson chief executive, and offers extensive experience across all areas of the UK retail financial services market.

In 2010, Nucleus' IFA-firm total reached 80 and the platform also broke the £2bn AUM barrier.
